Sales Flow.txt

How should the quotation generation step be phrased?
It was changed to 'Generate quotation and Qref' and the suggestion was applied.

Michael Johnson06/07/2026

How should the management decision be worded?
It was standardized to 'Quotation approved by management?' and the change was applied.

Customer Inquiry to Delivery Workflow

Diagram information
This diagram maps the end-to-end process from customer inquiries through internal handling, quotation approval, procurement, and final delivery. Key components: Customer (entry points: Email, WhatsApp, Website) -> Customer Service (receive & acknowledge, forward to Sales) -> Sales Team (Zoho Books, generate/send/revise quotation, follow-up, begin order processing) -> Management (approve/reject quotation) -> Procurement (procure product when out of stock) -> Logistics (check stock and deliver) -> End. Decisions include customer approval of quotation, management approval, and product stock availability; actions and handoffs route the flow between teams until delivery and completion.

Customer Inquiry to Delivery SOP
1. Start: Customer submits an inquiry via Email, WhatsApp, or Website.
2. Customer Service receives the inquiry.
2.1. Acknowledge the inquiry to the customer.
2.2. Forward the inquiry to the Sales Team.
3. Sales Team opens Zoho Books.
4. Sales Team generates a quotation and assigns a quotation reference (Qref).
5. Sales Team sends the quotation to Management for approval.
6. Management reviews the quotation.
6.1. If Management approves, Sales rep emails the quotation to the Customer.
6.2. If Management rejects, revise the quotation in Zoho Books and repeat steps 4-5.
7. Customer reviews the quotation.
7.1. If Customer approves the quotation, Customer sends a Purchase Order (PO) and Sales begins order processing.
7.2. If Customer rejects the quotation, Sales follows up with the Customer (revise or clarify as needed).
8. Sales Team begins order processing and checks product stock with Logistics.
9. Logistics checks product availability.
9.1. If product is in stock, Logistics delivers the product to the Customer and process ends.
9.2. If product is not in stock, send product description and purchase details to Procurement.
10. Procurement procures the product from the manufacturer or supplier.
11. Procurement hands off procured product to Logistics.
12. Logistics receives product and delivers it to the Customer.
13. End: Confirm delivery completed and close the order.
